How to install iOS 5 Beta

To install the iOS 5.0 Beta please follow these steps:

1. Activate your UDID with UDID Activation
2. Download your device specific firmware
3. Sync your iDevice with iTunes 10.5
4. In iTunes, hold OPTION (Mac) or SHIFT (Windows), and click the "Restore" button
5. Select the .ipsw file you downloaded in step 2
6. When prompted, select your most recent backup to get all your apps and contacts back.

Having trouble installing the beta? Here are a few errors you might come across

Error 3002 - You may get this error while trying to update, and not restore. Try it again, except this time restore.

"This device isnt eligible for the requested build" - Check your hosts file
